MORE THAN A TEST: A COMPLETE INSIGHT

miRNA & Protein Multiplexing

LiverAce™ COMBO is the only multiplex assay on the market that simultaneously quantifies the critical early-detection biomarker miRNA-122 and the key mechanistic biomarker Cytokeratin-18. All from a single 25 µL sample. No PCR, no amplification bias, and no complex workflows.

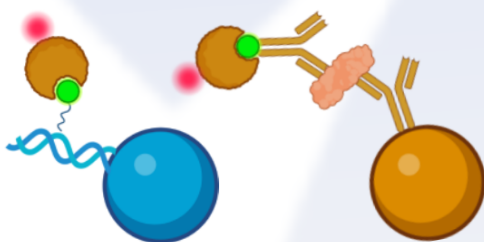

VALIDATED ON LUMINEX® xMAP® PLATFORMS

The first unified solution for Liver Toxicology Testing

COMBO Advantage:

miR-122 + Cytokeratin 18

TRADITIONAL METHOD	LIVERACE™ COMBO
Multiple labs 	Single lab 
Split samples 	One sample 
Complex workflow 	Streamlined process 
Relative quantification ?	Absolute quantification 
Days 	Five hours 

Ideal for Pharma R&D and CROs for Drug Safety Assessment & Liver Toxicity Screening.
